Summary

Full Stack Developer with 1+ year of hands-on experience building and deploying production web applications with Next.js, Node.js, JavaScript, and MongoDB/PostgreSQL. Solo-built a healthcare platform serving 2,000+ registered users and 500+ booked appointments, and built Slotly, an AI-assisted booking platform with concurrency-safe scheduling, Redis rate limiting, and automated tests.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js (App Router), Tailwind CSS, Framer Motion, GSAP
Backend: Node.js, Express.js, REST APIs, Webhooks, Zod, JWT, Google OAuth, NextAuth.js, RBAC
Databases: PostgreSQL, Prisma ORM, MongoDB, Mongoose, Redis, Transactions, Indexing
AI & Integrations: Gemini API (Function Calling), Razorpay, Nodemailer, Resend, Google APIs, Calendly API
Testing: Vitest, Supertest, Postman, ESLint
DevOps & Tools: Git, GitHub Actions, Docker, Vercel, Neon, Cloudflare, Hostinger, Linux
Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, Basic System Design

Experience

Young India Show Foundation — Delhi / Noida
Full Stack Developer (promoted from Intern) — *Jan 2026 – Sep 2026*

Full Stack Developer — *Jul 2026 – Sep 2026*

- Owned end-to-end delivery of production features using Next.js, Node.js, Express.js, and MongoDB, translating requirements into deployed releases.
- Implemented Google OAuth 2.0, JWT, and RBAC; integrated server-side Razorpay payment verification and webhooks.
- Integrated Resend, Calendly, and Google APIs for email notifications and scheduling workflows.
- Worked with GitHub Actions and Vercel deployment workflows; reviewed code and mentored interns on implementation practices.

Full Stack Developer Intern — *Jan 2026 – Jun 2026*

- Built 20+ REST API endpoints with Node.js, Express.js, and MongoDB for registrations, appointments, donations, payments, and admin workflows.
- Delivered full-stack features across 10+ applications, connecting frontend forms with backend services and database operations.
- Tested APIs and payment workflows with Postman; configured DNS/SSL and deployed applications on Vercel and Hostinger.

Freelance Full Stack Developer — Remote
Part-time / Contract – Independent Client Projects — *Aug 2025 – Dec 2025*

- Delivered 8+ client projects (websites, landing pages, portfolios, and management tools) across education, healthcare, and business, handling requirements, frontend, backend integration, and deployment.

Projects

Slotly – AI Appointment Scheduler | *Next.js, TypeScript, PostgreSQL, Prisma, Redis, Docker* — Live | GitHub

- Built a booking platform with PostgreSQL and Prisma where a Gemini assistant (function calling) checks availability and prepares signed booking proposals, confirmed by a separate server endpoint that works without the AI.
- Prevented overlapping bookings using PostgreSQL advisory-lock transactions (409 on conflict) and idempotent confirmation, so retried requests never create duplicate bookings.
- Added Redis rate limiting, Zod validation, hashed credentials and tokens, CSRF origin checks, and Nodemailer email notifications; wrote 30+ Vitest/Supertest integration, security, and concurrency tests; containerized with Docker.

Mission 100 Hospital Platform | *Next.js, Node.js, MongoDB, Razorpay* — mission100hospital.com

- Solo-built and deployed a healthcare platform for appointments, lab tests, and memberships, serving 2,000+ registered users with 500+ booked appointments.
- Implemented server-side Razorpay payment verification and webhook handling to validate payment status before confirming bookings and memberships.
- Built an admin dashboard for appointments, users, and lab reports with automated email alerts; monitored search visibility using Google Search Console.

Mailspace – Custom Domain Webmail | *Next.js, Node.js, MongoDB, Google APIs, Cloudflare* — Demo on request

- Built a webmail client with Google OAuth 2.0, inbox, folders, and rich HTML email rendering; processed inbound mail through Cloudflare Email Routing and webhooks and stored messages in MongoDB.

Vayu Galaxy | *Next.js, React.js, Tailwind CSS, Framer Motion, GSAP* — vayugalaxy.com

- Built a production company website with reusable React components, responsive layouts, and Framer Motion/GSAP animations; optimized media with lazy loading, preloading, and code splitting.

Certifications

Problem Solving | SQL (Intermediate) | Python (Basic) – HackerRank | Java Fundamentals – Scaler

Education

J.C. Bose University of Science and Technology, YMCA — Faridabad, Haryana
B.Tech, Computer Science & Engineering (Lateral Entry) – CGPA: 8.1/10 — *Aug 2023 – Jul 2026*

Raja Jait Singh Government Polytechnic — Faridabad, Haryana
Diploma, Electrical Engineering (Lateral Entry) – CGPA: 7.6/10 — *Aug 2021 – May 2023*
