🐙 github.com/TheHemantPandey

Full Stack Developer with 1+ year of combined hands-on development experience across freelance client projects and professional production environments. Experienced in building and deploying web applications across healthcare, non-profit, investment, education, restaurant, portfolio, and business domains using React.js, Next.js, Node.js, Express.js, MongoDB, REST APIs, authentication, payment integrations, third-party APIs, and cloud deployment. Delivered 8–10 independent client projects and contributed to 10+ production applications, with experience spanning requirements gathering, development, revisions, deployment, and technical handover. Additional experience with Gemini/OpenAI APIs, prompt engineering, webhooks, n8n, API integrations, and AI-powered workflow automation.

Experience

Young India Show Foundation

July 2026 – September 2026

Full Stack Developer

Delhi / Remote

- Continued as a Full Stack Developer after completing the internship, taking increased responsibility for production web applications, backend systems, integrations, deployment, and application maintenance.
- Developed and maintained production applications using Next.js, React.js, Tailwind CSS, Node.js, Express.js, and MongoDB across healthcare, non-profit, investment, and business domains.
- Designed and implemented REST APIs, database workflows, authentication, form processing, file handling, email workflows, and third-party integrations for production applications.
- Integrated Razorpay, Google APIs, Resend, Nodemailer, Calendly, webhooks, and API-to-API communication to automate business and client-facing workflows.
- Managed production deployments, environment configuration, debugging, API testing, performance improvements, and application maintenance using GitHub, Vercel, Hostinger, and Postman.
- Delivered frontend and backend features across production projects while collaborating on requirements, implementation, testing, deployment, and ongoing technical support.

Young India Show Foundation

January 2026 – July 2026

Full Stack Developer Intern

Delhi / Remote

- Developed and maintained production web applications using Next.js, React.js, Tailwind CSS, Node.js, Express.js, and MongoDB.
- Developed 20+ REST API endpoints and backend workflows supporting user registration, appointment booking, donations, payments, email notifications, and administrative operations.
- Integrated Razorpay, Google OAuth, Resend, Nodemailer, Google APIs, and other third-party services into production applications.
- Implemented validated form-to-API-to-database workflows with authentication, database operations, transactional emails, payment processing, and automated backend operations.
- Managed Git-based development and production deployments using GitHub, Vercel, and Hostinger while troubleshooting application and deployment issues.
- Improved responsive UI, SEO implementation, frontend performance, and production reliability across deployed platforms.

Independent Freelance Web Developer

May 2025 – February 2025

Freelance Full Stack / Frontend Developer

Remote

- Delivered 8–10 independent client projects from requirements gathering through development, revisions, deployment, and technical handover across education, restaurant, portfolio, management, landing-page, and custom web application use cases.
- Built responsive and production-ready interfaces using React.js, Next.js, HTML5, CSS3, Tailwind CSS, and modern component-based development practices.
- Developed backend functionality, REST APIs, database integrations, and server-side workflows for selected client projects using Node.js, Express.js, MongoDB, and related technologies.
- Integrated forms, email services, payment workflows, third-party APIs, and other client-specific functionality based on project requirements.
- Handled client revisions, debugging, deployment configuration, domain/hosting setup, and post-development technical support independently.
- Worked across both frontend-focused projects and full-stack applications, adapting the implementation based on project scope, existing infrastructure, and client requirements.

Selected Projects

Mission 100 Hospital | *Next.js, Node.js, MongoDB, REST APIs, Razorpay* 2026

- Built and maintained a production healthcare platform supporting patient registration, doctor/test booking, memberships, packages, dashboards, and online payments for 1000+ users.
- Developed backend APIs and integrated Razorpay with server-side payment verification, transactional email workflows, and database-driven booking processes.
- Implemented SEO, analytics, responsive UI, production monitoring, and deployment workflows for a live healthcare application.
- [Live Website](#)

Mailspace – Custom Webmail Client | *Next.js, Google APIs, Resend, Cloudflare* 2026

- Designed a full-stack custom-domain webmail platform using Google OAuth 2.0, Cloudflare Email Routing, Resend API, and webhook-based email processing.
- Implemented inbox management, HTML email rendering, folder organization, email synchronization, inbound/outbound workflows, and automated notifications.

Vayu Galaxy | *Next.js, React.js, Tailwind CSS, Framer Motion, GSAP* 2026

- Developed a modern production web platform with reusable React components, responsive layouts, animations, optimized navigation, and scalable page architecture.
- Implemented SEO-focused metadata, performance-conscious frontend architecture, and interactive user experiences across the platform.
- [Live Website](#)

Young India Show Foundation Website | *Next.js, Node.js, MongoDB, REST APIs* 2026

- Developed an NGO platform with volunteer registration, donation workflows, event functionality, contact forms, and administrative features.
- Built secure form-to-API-to-database pipelines and automated email workflows supporting production operations.
- [Live Website](#)

PUNPUN Services | *Next.js, Tailwind CSS, Framer Motion, SMTP* 2026

- Developed a responsive digital agency platform with reusable components, service-focused interfaces, animations, contact workflows, and SEO-oriented implementation.
- Implemented server-side communication workflows for contact, consultation, careers, and newsletter functionality.

Technical Skills

Languages: JavaScript (ES6+) · TypeScript · Java · Python · SQL · HTML5 · CSS3

Frontend: React.js · Next.js · Tailwind CSS · Redux Toolkit · Framer Motion · Responsive UI

Backend & APIs: Node.js · Express.js · REST APIs · Middleware · Webhooks · API Integration

Databases: MongoDB · Mongoose · MySQL · Firebase Firestore

AI & LLM: Gemini API · OpenAI API · LLM Integration · Prompt Engineering · AI-Assisted Workflows

Automation: n8n · Webhook Automation · API-to-API Integration · Email Automation · Scheduling Automation

Authentication & Security: JWT · NextAuth.js · Google OAuth 2.0 · Role-Based Access Control

Third-Party Services: Razorpay · Google APIs · Resend · Nodemailer · Calendly API · Cloudflare

Cloud & Tools: Git · GitHub · GitHub Actions · Vercel · Hostinger · Postman · Google AI Studio · Cursor

Key Highlights

- | | |
|---|-------------------------------|
| ✓ 1+ Year Combined Development Experience | ✓ Full Stack Development |
| ✓ 8–10 Freelance Client Projects | ✓ Payment Gateway Integration |
| ✓ 10+ Production Web Applications | ✓ AI / LLM API Integration |
| ✓ 20+ REST APIs Developed | ✓ Workflow & API Automation |
| ✓ 1000+ Users Supported | ✓ OAuth 2.0, JWT & CI/CD |

Education

J.C. Bose University of Science and Technology

Bachelor of Technology in Computer Science Engineering (Lateral Entry) — CGPA: 8.1/10.0

August 2023 – July 2026

Faridabad, Haryana

Raja Jait Singh Government Polytechnic

Diploma in Electrical Engineering (Lateral Entry) — CGPA: 7.6/10.0

August 2021 – May 2023

Faridabad, Haryana
