Experience

Young India Show NGO Foundation

January 2026 – July 2026

Full Stack Developer Intern

Hybrid

- Developed and maintained production-ready web platforms.
- Implemented secure payment processing workflows, automated appointment scheduling systems, and asynchronous database pipelines to optimize server side processing.
- Developed and deployed REST APIs with JWT authentication
- Streamlined application delivery pipelines by utilizing Git version control and automating web deployments across Vercel and Hostinger cloud environments.

Projects

Mission 100 Hospital | *Next.js, MongoDB, Razorpay, Hostinger* | Live Website

January 2026 – July 2026

- Developed a production healthcare application supporting automated patient onboarding, dynamic slot allocations, and administrative control panels.
- Integrated Razorpay payment gateway with backend webhook validation for secure transaction processing.

Mailspace – Custom Webmail Client | *Next.js, Resend API, Cloudflare Routing, OAuth*

April 2026 – Present

- Built a secure full-stack webmail platform allowing users to process custom domain email infrastructures dynamically.
- Implemented Google OAuth 2.0 protocol alongside JWT to standardize access controls and protect user email metadata.
- Designed backend asynchronous webhooks to capture inbound communications using Cloudflare Email Routing rules and Resend API integrations.

Delhi Angel Network | *Next.js, MongoDB, Calendly Integration* | Live Website

January 2026 – July 2026

- Optimized platform interfaces mapping professional connections between early-stage founders and industry mentors.
- Configured secure multipart form uploads and storage logic to handle document submissions with strict file validation layers.
- Integrated Calendly webhook architectures to automate cross-platform meeting management and reduce scheduling drop-offs.

PassOP – Password Manager | *React.js, Node.js, Express.js, MongoDB*

2025

- Designed a robust full-stack password management tool with complete CRUD operation lifecycles and secure data processing.
- Constructed secure REST APIs with Node.js and Express to interact safely with document models hosted on a MongoDB cluster.
- Created a highly responsive interface with Tailwind CSS focusing on secure UI logic, masking states, and immediate clipboard actions.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3, SQL, Python, Java

Frontend: React.js, Next.js (App Router), Tailwind CSS, Responsive Design, Server-Side Rendering (SSR)

Backend: Backend: Node.js, Express.js, REST APIs, Authentication, Authorization

Databases: MongoDB, MongoDB Atlas, MySQL, DBMS

Tools & Version Control: Git, GitHub, Postman, VS Code, Problem Solving

Cloud & Deployment: Vercel, Hostinger, Cloudflare Email Routing, CI/CD Basics

Education

J.C. Bose University of Science and Technology (YMCA)

August 2023 – July 2026

Bachelor of Technology in Computer Science Engineering (Lateral Entry) – CGPA: 8.1/10.0

Faridabad, Haryana

Raja Jait Singh Government Polytechnic

August 2021 – May 2023

Diploma in Electrical Engineering (Lateral Entry) – CGPA: 8.0/10.0

Faridabad, Haryana

Certifications

HackerRank SQL (Intermediate) • Scaler Java: Mastering the Fundamentals
