Summary

Software Engineer / Full Stack Developer with 1+ year of combined hands-on experience building and deploying production web applications. Strong in React, Next.js, Node.js, Express, and MongoDB, with experience in REST APIs, authentication, payments, third-party integrations, CI/CD, and production debugging. Delivered 10+ applications, solo-built a healthcare platform used by 2,000+ registered users, and mentored 3–4 interns.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Framer Motion, GSAP, Responsive Design
Backend: Node.js, Express.js, REST APIs, Middleware, Webhooks, Request Validation, Error Handling
Databases: MongoDB, Mongoose, MySQL, Firestore, Schema Design, Data Modeling, Indexing
Auth & Security: JWT, Google OAuth 2.0, NextAuth.js, RBAC, Protected Routes, CORS, API Security
Integrations: Razorpay, Google APIs, Resend, Nodemailer/SMTP, Calendly API, Cloudflare
AI: Gemini API, OpenAI API, LLM Integration, LLM Function Calling, Prompt Engineering
DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), Postman, Vercel, Hostinger, Linux, DNS/SSL
Fundamentals: Data Structures & Algorithms, OOP, RESTful Architecture

Experience

Young India Show Foundation — Delhi / Noida
Full Stack Developer (promoted from Intern) — *Jan 2026 – Sep 2026*

Full Stack Developer — *Jul 2026 – Sep 2026*

- Promoted to core developer; owned production delivery, backend systems, and deployments using Next.js, React.js, Node.js, Express.js, and MongoDB.
- Built secure authentication using Google OAuth 2.0, JWT, RBAC, and protected routes; implemented Razorpay server-side payment verification and webhooks.
- Integrated Resend, Nodemailer, Calendly, and Google APIs for emails, notifications, and scheduling workflows.
- Set up GitHub Actions CI/CD on Vercel and supported live applications after release.
- Mentored 3–4 interns, conducted code reviews, and translated client and founder requirements into production.

Full Stack Developer Intern — *Jan 2026 – Jul 2026*

- Built 20+ production REST API endpoints for registration, appointments, donations, payments, email notifications, and admin workflows.
- Delivered 10+ full-stack applications with validated form-to-database CRUD workflows and error handling.
- Handled requirements, database modeling, UI development, API testing, deployment, and production support.
- Configured DNS/SSL and deployed applications on Vercel and Hostinger; managed Git and Postman API testing.

Freelance Full Stack Developer — Remote
Independent Client Projects — *August 2025 – Feb 2026*

- Delivered 8+ freelance client projects, including business websites, landing pages, portfolios, and custom web applications.
- Handled end-to-end delivery, including client requirements, responsive UI, backend integration, revisions, deployment, and handover.

Projects

Mission 100 Hospital Platform | *Next.js, Node.js, MongoDB, Razorpay* — mission100hospital.com

- Solo-built a live healthcare platform end to end, including frontend, REST APIs, payments, database workflows, and admin dashboard, with 2,000+ registered users and 500+ appointments booked.
- Integrated Razorpay with server-side payment verification for appointments, lab tests, and memberships.
- Built admin workflows for appointments, users, and lab reports with automated email alerts; monitored traffic and SEO using Google Search Console.

Mailspace – Custom Domain Webmail | *Next.js, Node.js, Google APIs, Resend, Cloudflare* — Live demo on request

- Built a webmail client for custom-domain and personal accounts with Google OAuth 2.0 authentication, inbox, folders, and rich HTML email rendering.
- Ingested inbound mail using Cloudflare Email Routing and Resend webhooks with message synchronization and backend processing workflows.

Vayu Galaxy | *Next.js, React.js, Tailwind CSS, Framer Motion, GSAP* — vayugalaxy.com

- Built a production company website and product platform using reusable React components, responsive layouts, and Framer Motion/GSAP animations.
- Improved performance through image optimization, lazy loading, preloading, and code splitting; optimized Core Web Vitals and SEO.

Young India Show Portal | *Next.js, Node.js, MongoDB, REST APIs* — youngindiashow.com

- Built a production NGO platform supporting volunteer registration, donations, events, contact workflows, and administrative operations.
- Implemented validated form-to-API-to-database workflows, CRUD operations, email notifications, and production deployment.

Education

J.C. Bose University of Science and Technology, YMCA — Faridabad, Haryana
B.Tech, Computer Science & Engineering (Lateral Entry) – CGPA: 8.1/10 — *Aug 2023 – Jul 2026*

Raja Jait Singh Government Polytechnic — Faridabad, Haryana
Diploma, Electrical Engineering (Lateral Entry) – CGPA: 7.6/10 — *Aug 2021 – May 2023*

Class XII (PCM): 84% | Class X: 82%
